LASERPHONIC FANTASY THE SKY'S THE LIMIT

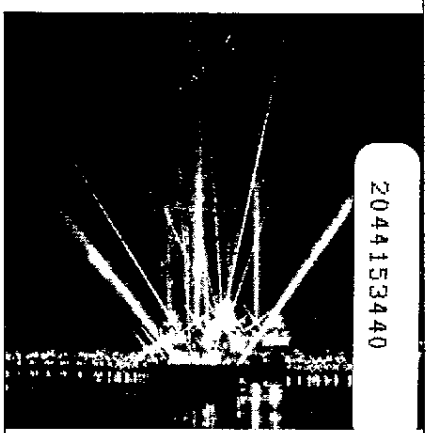
EPCOT CENTER — You haven't seen a light show until you've seen Laserphonic Fantasy, an extraordinary visual experience that has to be seen to be believed.

The middle of the World Showcase Lagoon is the setting for a high-tech Saturday night frenzy where the night sky is the stage for dancing laser beams that put shooting stars to shame.

Lasers, lights, fountains and fireworks combine in a constellation that challenges your senses.

Laser beams cross in mid-air. Laser animation paints breathtaking murals. Fountains leap 80 feet to form spectacular images in a full rainbow spectrum. Fireworks join in the extravaganza.

Accompanying all this is a soundtrack of classical music synthesized and broadcast on one of the world's largest outdoor high fidelity sound systems.



2044153440

The sky above World Showcase comes to life during Laserphonic Fantasy every Saturday evening in Epcot Center.

Your eyes and ears won't believe it's real. Laserphonic Fantasy — there's nothing quite like it anywhere. Don't miss it! Saturdays at 10 p.m.
